Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to pressurized aerosol composition, classified in class 424, subclass 47.
- II. Claims 11-16, drawn to a concentrate composition, classified in class 424, subclass 67 or 400.
- III. Claims 17-20, drawn to methods of treating foot or shoe odors, classified in class 424, subclass 642.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I or II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process as claimed can be practiced with various materially different products such as other known pressurized spray compositions available commercially or such products as taught by Lisboa et al in US Patent 5,679,324 or Nakane et al in US Patent 5,122,418 (IDS filed 12/19/2000, Paper No. 2).

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04,

MPEP § 808.01). In the instant case the different inventions have different modes of operation as they are materially different.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Henry Hadad on January 28, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh whose telephone number is 703-306-5400. The examiner can normally be reached on 8:30 am - 6:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie can be reached on 703-308-4612.
